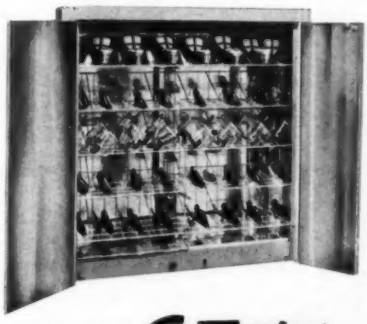
STERILIZED PROTECTION



with the GATEWAY SANISTOR

Schools can secure both maximum levels of sterilization and savings with the Gateway SANISTOR. This new cabinet not only provides safe storage for all types of spectacles and other small eye and face protective devices but sanitizes them within a few hours — thus almost completely eliminating any chance of eye infection being transferred through common use of safety glasses.

The Gateway SANISTOR provides maximum sterilization because the entire interior area of the cabinet and the shelves have special reflective surfaces which refract the irradiation onto every part of the spectacle or other safety device.

By all means, write for details today—because the SANISTOR will greatly pay for itself in the savings it provides!
